

Berrybank Stage 2 Wind Farm

Construction Report - 09/11/2021

Construction Works This Week:

Turbine component deliveries will begin to arrive at WTG66, WTG67, WTG68 and WTG69, which are all located off Foxhow-Berrybank Road.

Cable trenching works are being completed from the Internal Substation to Werneth Road with the cables to cross Boundary Road.

Rehabilitation works on drains and access tracks are continuing across the whole wind farm site.

Construction Works Next Week:

Turbine components will continue to be delivered to the construction area off Foxhow-Berrybank Road and begin in the northern area of the wind farm.

Installation works will be continuing in the southern area of the wind farm.

Cable trenching works will be continuing on the central area of the wind farm.

Construction Works coming up over the next month:

Turbine components will continue to be delivered to the wind farm.

Installation works will be continuing in the southern area of the wind farm.

Cable trenching works will be continuing on the central area of the wind farm and under boring works will be commencing to link the northern, central and southern areas of the wind farm together.
