# Berrybank 2 Wind Farm

## Community Update

### Community Engagement Committee

The **Berrybank 1&2 Wind Farms' Community Engagement Committee (CEC)** was invited in February by **Federation University** for a tour of the **newly constructed Wind Turbine Tower Training Facility** which is located at the **Asia Pacific Renewable Energy Training Centre (APRETC)** within the Mt. Helen Campus. APRETC which has been co-funded by GPG through Berrybank 1 Wind Farm along with other wind companies will provide a state-of-the-art purpose-built training centre to meet the demand for local skilled workers in the renewable energy sector.

### Project Specific Website

GPG has continued our partnership and collaboration with Hstudios in Ballarat to develop a new project specific website for Berrybank 2 Wind Farm. The new website officially went live on **23<sup>rd</sup> December 2021** and can be found at:

- [www.berrybanktwowindfarm.globalpower-generation.com.au](http://www.berrybanktwowindfarm.globalpower-generation.com.au)

You will find there all our relevant project documents, construction updates, photos & videos of the project and any upcoming events.

## Construction Update

Over the past 2 months construction has moved at a relatively steady and consistent pace, **all major civil works are now complete** with final trim and clean up started over the entire Berrybank 2 site.

The electrical contractors have continued to **install the 33kv medium voltage underground cable** with now having completed over 90% of the total 66.5km's of cable, the under boring crew has arrived on site and begun the installation of these cables which run under the Hamilton Highway and the Railway Line which is the vital connection point between the north and south of the Wind Farm.

The installation crews have been working hard to make use of the decent weather that has fallen upon us over the past couple of months, they have now completed the **full installation of 17 of the 26 Wind Turbine Generators**.

The transmission line team has now **completed the stringing of the Berrybank 2 Wind Farm overhead transmission line** that connects the Wind Farm to the Victorian Electrical Grid via the Ballarat-Terang Transmission Line.
