# Berrybank 2 Wind Farm

## Community Update

### Community Grants Program

As part of Berrybank 2 Wind Farm's Community Engagement and Benefits Sharing Plan, our community funding opportunities will be increased as we will be providing a **Community Grants Program** that will be available in **2023** and will run in conjunction with the Berrybank 1 Wind Farm's Community Grants Program.

### Neighbor Benefit Program

Voluntary deeds for neighbours whose household is located within a maximum radius of **2 km of the wind farm** in order to share with them the benefits generated by the Wind Farm, not only during construction but also during the operation period, are still available to be entered into at any time during the construction and operations periods of the wind farm.

### Community Engagement Committee Meetings

Berrybank 2 Wind Farm's Community Engagement Committee is currently looking for anyone that is interested in shaping the future of the Berrybank Wind Farm Community Programs to please get involved and apply to join the committee.

We are looking to fill **3 vacant positions** for local community members on the Community Engagement Committee for both Berrybank 1 and Berrybank 2 committees. CEC meetings are held on the first Monday of every second month with the next meeting to be held on **Monday 4th April at 10am**, at Berrybank Public Hall. If you are interested in joining the committee, please contact Nathan Micallef at [nathan.micallef@globalpower-generation.com.au](mailto:nathan.micallef@globalpower-generation.com.au) or phone **0400 403 282**.

## Construction Update

The electrical contractors have continued to **install the 33kv medium voltage underground cable** with now having completed the under boring under the Hamilton Highway and the Railway Line which is the vital connection point between the north and south of the Wind Farm and achieving **over 90%** installation of the total **66.5km's** of underground cable.

The installation crews have been working hard to make use of the decent weather that has fallen upon us over the past couple of months, they have now completed the **full installation of 23 of the 26 Wind Turbine Generators**.
